

Diagram D - D shows a cross-section of a semiconductor device. The structure includes a substrate with a top layer labeled OF171. Below this is a layer with a thickness of 21. A central region is labeled W161 and is surrounded by a layer labeled PL180. The bottom layer has a thickness of 59. The overall width of the device is indicated as 11. The top surface has two main regions labeled 50 and 52, with a central region labeled 48. The bottom surface has a region labeled 100 and a central region labeled 49. The diagram also shows various electrical contacts and interconnects, including a region labeled IF177 at the bottom left.
